JOHN R. BAZA  
Division Director

## Inspection Report Minerals Regulatory Program May 3, 2010

Reviewed: 

Mine Name: Daddy Dearest	Permit Number: S/015/0046
Operator Name: T. J. Clark	Inspection Date: 03/25/2010
Inspector(s): Brett Gregory for Wayne Western	Time: 4:00 pm
Other Participants: None	Mine Status: Inactive

Elements of Inspection	Evaluated	Comment	Enforcement
1. Permits, Revisions, Transfer, Bonds	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Public Safety (shafts, adits, trash, signs, highwalls)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Protection of Drainages / Erosion Control	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Deleterious Material	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Roads (maintenance, surfacing, dust control, safety)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Concurrent Reclamation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Backfilling/Grading (trenches, pits, roads, highwalls, shafts, drill holes)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Water Impoundments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Soils	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Revegetation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
11. Air Quality	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12. Other	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Bond Amount:** \$20,000 (LOC)

**Permit fee:** Current

### Purpose of Inspection:

A Division directive required the operator remove hazardous waste and garbage from the site. An inspection was necessary to validate the cleanup.

### Inspection Summary:

Wayne Western of the Division of Oil, Gas and Mining, and Christopher Conrad of the Bureau of Land Management met with Mr. Clark on November 18, 2009 to discuss the necessary details required for the site cleanup. My findings of the work performed are as follows:

- 2) All hazardous waste and trash were removed successfully.
- 3) The surface has been regraded to minimize the erosion problem. Additional effort can still be made to contain the sediment within the site (i.e. berm buildups, silt fences, water-bars, etc.).
- 12) The rock fall hazard has not been removed. It is suggested the operator avoid adding additional rock to the outer slope where rocks potentially may roll down onto the road. The operator needs to minimize this hazard to avoid any liability.

(Photographs attached)

**Conclusions and Recommendations:**

The operator has removed all deleterious material and trash from the site. No significant erosion problems were found that need immediate repairing. The operator has met the requirements within the Division directive. DOGM will continue to monitor and inspect the site when in the area.

Hazardous waste before cleanup.

After cleanup.

Erosion before reclamation.

Reclaimed surface.

Erosion before reclamation.

Reclaimed surface. (The berm in the background should be built up.)

Erosion before reclamation.

Minor erosion still visible after reclamation.

Excess garbage on site.

Removed garbage.

Unstable rocks before...

Same unstable rocks after... (No additional rocks should be added here!)
